

Case Study 1

DESCRIPTION

Problem Statement

Create a Greeting message generator using javascript. User should enter First Name and Last Name and your system generates a greeting message as 'Hello FirstName LastName'.

Example:

First Name = John(Say)

Last Name = Ryder(Say)

Output :

Hello John Ryder

Note:

1. First Name input element has a Id of '**first**'.
2. Last Name input element has a Id of '**second**'.
3. Output message has a Id of '**output**'.
4. Button has an Id of '**btn**'.
5. You should set the output message in the id of output.

Sample View

Hello Steve Jobs
